A B

- A : cooling shroud
- B : pressure shroud (Booster)

The diagram illustrates a mechanical assembly, likely a pump or motor, mounted on a base. Key dimensions are indicated: width b is the distance between the two vertical support legs; length a is the total width of the unit; length c is the distance from the center of the left support leg to the center of the right support leg; and a height of 200 is shown on the left side.

A : cooling shroud

B : pressure shroud (Booster)

Remarks :

- 1) Details on request

2) Motors "FRw..." are FRANKLIN rewirable motors. Motors "FR..." are FRANKLIN canned-type motors.

Motor selection for water temp. 20 °C, and velocity at motor surface $\geq 0.2\text{m/sec}$. Motor leads must be submerged.
